Profile

React Front-End Developer with a Bachelor's in Computer Applications (2024) and strong expertise in building dynamic, user-friendly web applications. Proficient in the MERN stack (MongoDB, Express.js, React.js, Node.js), with a solid grasp of state management, API integration, and scalable application design. Experienced in developing full-stack solutions with secure authentication, responsive UI/UX, and robust backend functionality.

Work Experience

IMC Business Solutions

07/2025 – Present

Junior Web Developer

- Contributed to the development and maintenance of a **billing and accounting system** built.
- Worked with **legacy databases** to update, migrate, and improve existing data structures with **Django**.
- building and maintaining **React-based websites** for clients and internal teams.
- Contributed to the development of **field sales applications** for tracking and reporting sales activities.
- Collaborated with senior developers to debug issues, implement new features, and enhance overall application performance.
- Gained hands-on experience in **backend and frontend development**, as well as **database management** and **API integration**.

Vonnue Innovations Ltd - Internship

08/2024 – 04/2025

Sulthan Bathery

Web Developer

- Built and deployed **full-stack applications** using modern technologies like **React**, **Zustand**, **Firebase**, and **Node.js**, following **component-driven architecture** and **state management principles**.
- Designed and implemented **RESTful APIs** using **Express** and **Node.js**, including **authentication and authorization flows** with **JWT**.
- Followed **best practices** in **Git version control**, **code structuring**, and **debugging** throughout the full-stack development process.
- Enhanced **frontend development skills** by replicating popular websites such as **Airbnb**, **Doordash**, and **Microsoft Azure**.
- Completed several **JavaScript tasks** and **mini-projects** to strengthen understanding of **core programming concepts**.

Education

CALICUT UNIVERSITY

06/2021 – 04/2024

BACHELOR OF COMPUTER APPLICATION

WMO ART'S AND SCIENCE COLLEGE MUTTIL

Skills

- | | |
|-----------------|---------------|
| • React.Js | • HTML |
| • Node Js | • CSS |
| • Express Js | • Material UI |
| • Mongo DB | • Javascript |
| • Redux Toolkit | • Python |
| • Context API | • Git |

Projects

TimeTrack – Time Management Full-Stack App

Built a productivity-focused full-stack application using React, Zustand for state management, and Firebase, Express ,Node for backend services including authentication and database. Enabled users to create tasks, track completion, and set reminders through an intuitive UI. Deployed Netlify

Natours – Backend REST API App

Developed a backend-heavy tour booking application using Node.js, Express, and MongoDB. Implemented JWT-based authentication and role-based access control. Built advanced features like filtering, pagination, and geospatial queries.

TrackCoder – Coding Activity Tracker (PYTHON)

Python-based desktop tool that tracks daily coding activity and logs time spent.

Saved approximately **40 minutes** per week for interns by automating daily Slack status updates with accurate coding logs.
